

DISANN KATENDE, MPH

Research Epidemiologist | Public Health Data Analyst | Geospatial Specialist
Email: disann.katende@example.com | LinkedIn: linkedin.com/in/disannkatende

SUMMARY

Research Epidemiologist with MPH training and practical experience in public health research, disease surveillance, geospatial analysis, and statistical modelling. Skilled in synthesizing complex health datasets, evaluating community-level patterns, and translating evidence into actionable insights for prevention, intervention planning, and policy.

CORE SKILLS

- ? R, SAS, SQL, Python
- ? ArcGIS Pro, QGIS, Shiny
- ? Spatial epidemiology, geospatial analysis, disease surveillance
- ? Cox models, regression, survival analysis, multilevel modelling
- ? Data cleaning, linkage, dashboard development, report writing

EDUCATION

Master of Public Health (MPH)

University of British Columbia

EXPERIENCE

Research Epidemiologist / Public Health Data Analyst

Public health, epidemiology, surveillance, and geospatial analysis projects across Canada and East Africa

- ? Designed analytical workflows for large linked health datasets and public health surveillance projects
- ? Applied spatial statistics, regression, and clinical/public health data methods to identify patterns
- ? Produced maps, dashboards, and evidence briefs to support public health decision-making

SELECTED PROJECTS

- ? NTD & Vector-Borne Disease Surveillance ? analyzed treatment coverage and spatial inequalities in Malawi using GIS, Moran's I, and multivariable regression.
- ? Air Pollution and Cancer in Canada ? linked large health and environmental datasets to evaluate associations with cancer outcomes using Cox models and geospatial methods.
- ? Public Health Decision Support ? developed interactive dashboards and visual analytics to communicate findings to non-technical stakeholders.
